3. Purchasers outside the UK are responsible for any taxes, customs or excise duties that may apply in the country of delivery.

## **C-Map Professional / C-Map Professional + (previously called CM93/3)**

C-Map Professional and C-Map Professional + are two worldwide electronic vector chart databases developed by Jeppesen Marine. The charts are delivered in System Electronic Navigational Chart (SENC) format for direct use in both ECS and ECDIS systems. Jeppesen Marine continuously maintains its chart database by adding new chart editions and updates into new releases.

The databases are highly optimised for memory saving. On average, a C-Map Professional chart is five times smaller than the corresponding chart in S-57 format. This compression allows for a larger number of charts to be stored on memory media and also reduces the cost of communication when transmitting electronic Notices to Mariners via GSM, Inmarsat or similar channels.

C-Map Professional is supplied on CD Rom. C-Map Professional + contains additional data and is supplied only on DVD. Users need to check with their ECDIS or ECS manufacturer to find out whether their system can accept the newer DVD format or only CD Rom.

### **Designed for automatic updating**

C-Map Professional charts may be updated by an automatic procedure based on electronic Notices to Mariners sent to the user via e-mail, Internet HTTP, Inmarsat, GSM mobile phone etc. This process can easily be monitored by the user, but does not require manual intervention.

A New Edition service is available too, called Online +, but this requires broadband.

### **Chart coverage and purchasing**

Jeppesen C-Map charts can be leased annually to include the updating service, or bought outright with no updating service. If the charts are bought, they can be updated for 50% of the recommended retail price.

The chart coverage is divided in nine Zones, and then sub-divided into Standard Areas, Special Areas and Cells. You can choose any combination of Zones and areas.

Please contact us to let us know what chart coverage you require, and we can then provide you with an estimate of cost.
